5. **Regarding claim 17 (Renumbered as 9)**, the main reason for indication of allowable subject matter is because the prior art fails to teach or reasonably suggest, including all the elements of the present claim, estimating an amount of noise in a frequency component except for a zero-order component based on a combination of the zero-order component in the signal in the frequency space transformed at step (b), and the temperature and signal gain respectively obtained at steps (c) and (d).
